Bhubaneswar, India | +91-6377502016 | diptanshuvishwa364@gmail.com | linkedin.com/in/diptanshu-vishwa | github.com/DiptanshuVishwa

SUMMARY

Backend-focused Full Stack Developer pursuing a B.Tech in Computer Science with hands-on experience building scalable RESTful APIs, JWT-based authentication and authorization systems, and MongoDB-backed web applications using Node.js and Express.js. Proficient in React.js, AI/LLM integrations, and asynchronous workflows, with production-deployed applications and 2nd Runner-Up recognition at a competitive hackathon.

EXPERIENCE

Backend Developer | SDIS Hackathon, Team ParaX | Bhubaneswar, India 2026

- Developed and maintained scalable Node.js and Express.js backend APIs for complaint registration and tracking, supporting 100+ concurrent users with modular architecture and optimized routing.
- Designed RESTful APIs reducing average API response time by ~30% through efficient query design and structured error handling.
- Integrated Google Gemini API for AI/LLM-based automatic issue categorization and routing, improving issue resolution accuracy by ~40%.
- Implemented real-time notifications and GPS-based tracking via Firebase, enabling sub-second data updates to end users.
- Delivered production-ready full-stack application earning 2nd Runner-Up honors among 50+ competing teams.

EDUCATION

B.Tech – Computer Science and Communication Engineering Expected May 2027

Kalinga Institute of Industrial Technology (KIIT) | GPA: 3.1 / 4.0 (converted from 7.65 / 10.0)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Cloud Computing

SKILLS

Programming Languages: JavaScript (ES6+), Java, C, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, React.js, Material UI, Bootstrap

Databases: MongoDB, MySQL

Backend & APIs: RESTful APIs, JWT Authentication, Google OAuth, Role-Based Access Control, Asynchronous Workflows, Performance Optimization, Modular Architecture

Cloud Platforms & Tools: AWS S3, Firebase, Vercel, Git, GitHub, VS Code, API Testing, Debugging

AI/LLM: Google Gemini API

PROJECTS

MEDI-VAULT – AI-Powered Medical Document Management github.com/DiptanshuVishwa

React.js, Node.js, Express.js, MongoDB, AWS S3, Google Gemini API | Deployed on Vercel + Render

- Deployed production full-stack application with JWT and Google OAuth authentication and AWS S3 file storage pipeline, securing sensitive medical documents end-to-end.
- Designed RESTful APIs with role-based access control and integrated AI/LLM report analysis via Gemini API, reducing manual document review time by ~50%.

NagarMitra – Smart Civic Issue Reporting Platform

Node.js, Express.js, MongoDB, AWS S3, Firebase, Google Gemini API

- Built scalable backend architecture handling multi-user concurrent requests with real-time Firebase notifications and GPS tracking, achieving sub-second data updates.
- Implemented asynchronous workflows and AI/LLM-based categorization using Gemini API, improving complaint routing efficiency by ~40%.

CERTIFICATIONS

REST API (Intermediate) – HackerRank | Node.js (Basics) – HackerRank | JavaScript (Intermediate) – HackerRank | AWS Academy Cloud Architecture & Foundations – Amazon Web Services
